

ADVERTISING DESIGN PARTNER

JOB SUMMARY

Create award-winning ideas and concepts for print and digital communications to a target audience; present and communicate creative ideas through the preparation of presentation boards, models and physical samples; design visual and graphical elements to implement creative ideas onto intended media; develop copy language to enhance the communicated message; develop and produce designed items into production-ready output; and oversee production of created pieces to ensure produced items match intended design. Study graphic elements, determine size and arrangement of graphics and copy, select type, arrange layout, draw samples and prepare instructions for printers and other vendors. Participate in all aspects of creative, design and production, including client meetings and vendor supervision.

Develop business opportunities and bring in new clients.
